(54) Measuring gauge

(57) A measuring gauge for measuring the remaining alcohol or beverage in a bottle has an accurately calibrated (to 1/6th and/ or 1/5th of a gill units and/or any other such measures as may be required), perspex/plastics measuring scale. Specially shaped gauges are used for specific bottles due to their differing shapes and sizes. A foot is incorporated at ninety degrees to the calibrated scale, which is placed either on a work surface or on the base of the bottle enabling a very accurate measurement of the liquid remaining in the bottle to be taken, either in an upright or inverted position. This ensures an accurate and precise measurement of liquid remaining in a bottle for stocktaking purposes.

Categories of documents

- X: Document indicating lack of novelty or of inventive step. P: Document published on or after the declared priority date but before the filing date of the present application.
Y: Document indicating lack of inventive step if combined with one or more other documents of the same category. E: Patent document published on or after, but with priority date earlier than, the filing date of the present application.
A: Document indicating technological background and/or state of the art. &: Member of the same patent family; corresponding document.

Category	Identity of document and relevant passages	Relevant to claim(s)
X	GB 2236596 A (BEGEMANN) cross leg 102	1
X	GB 2103378 A (COGSWELL) see Figures 1 and 2	1
X	GB 1475619 (XUEREB) see Figure 1	1
X	GB 858738 (HYGRADE FOOD) flange 11	1
X	GB 720839 (GORDON & GOTCH) see Figure 1	1
